

Base from 2006 U.S. Department of Agriculture National Agriculture Imagery Program (NAIP) Data. Quaternary Fault traces from 2008 U.S. Geological Survey Fault and Fold Database of the United States. Photo center points and base map in NAD 1983.

Since the aerial photograph frame center-points are estimated, some undetermined positional error exists between the frame center points and the actual ground locations.

This open-file release makes information available to the public that may not conform to UGS technical, editorial, or policy standards; this should be considered by an individual or group planning to take action based on the contents of this report.
