Robert Robison	Mineral Industry
Charles Semborski	Mineral Industry
Richard R. Kennedy	Economics-Business/Scientific
David Terry, Director, Trust Lands Administration	<i>Ex officio member</i>

UTAH GEOLOGICAL SURVEY

The **UTAH GEOLOGICAL SURVEY** is organized into five geologic programs with Administration, Editorial, and Computer Resources providing necessary support to the programs. The **ECONOMIC GEOLOGY PROGRAM** undertakes studies to identify coal, geothermal, uranium, hydrocarbon, and industrial and metallic resources; initiates detailed studies of these resources including mining district and field studies; develops computerized resource data bases, to answer state, federal, and industry requests for information; and encourages the prudent development of Utah's geologic resources. The **APPLIED GEOLOGY PROGRAM** responds to requests from local and state governmental entities for engineering-geologic investigations; and identifies, documents, and interprets Utah's geologic hazards. The **GEOLOGIC MAPPING PROGRAM** maps the bedrock and surficial geology of the state at a regional scale by county and at a more detailed scale by quadrangle. The **GEOLOGIC EXTENSION SERVICE** answers inquiries from the public and provides information about Utah's geology in a non-technical format. The **ENVIRONMENTAL SCIENCES PROGRAM** maintains and publishes records of Utah's fossil resources, provides paleontological and archeological recovery services to state and local governments, conducts studies of environmental change to aid resource management, and evaluates the quantity and quality of Utah's ground-water resources.

The UGS Library is open to the public and contains many reference works on Utah geology and many unpublished documents on aspects of Utah geology by UGS staff and others. The UGS has several computer data bases with information on mineral and energy resources, geologic hazards, stratigraphic sections, and bibliographic references. Most files may be viewed by using the UGS Library. The UGS also manages a sample library which contains core, cuttings, and soil samples from mineral and petroleum drill holes and engineering geology investigations. Samples may be viewed at the Sample Library or requested as a loan for outside study.

The UGS publishes the results of its investigations in the form of maps, reports, and compilations of data that are accessible to the public. For information on UGS publications, contact the Natural Resources Map/Bookstore, 1594 W. North Temple, Salt Lake City, Utah 84116, (801) 537-3320 or 1-888-UTAH MAP. E-mail: nrugs.geostore@state.ut.us and visit our web site at <http://www.ugs.state.ut.us>.

The Utah Department of Natural Resources receives federal aid and prohibits discrimination on the basis of race, color, sex, age, national origin, or disability. For information or complaints regarding discrimination, contact Executive Director, Utah Department of Natural Resources, 1594 West North Temple #3710, Box 145610, Salt Lake City, UT 84116-5610 or Equal Employment Opportunity Commission, 1801 L Street, NW, Washington DC 20507.

Map Index - operator listed alphabetically by county

SEGMENT	PLAN	TYPE
BM=base metal	S=surface	E=evaporative process
EM=energy mineral	U=underground	F=facility
IM=industrial mineral		M=mine
PM=precious metal		P=pit
		Q=quarry
PERMIT STATUS		
ACT=active	INA=inactive	PRO=proposed
		REC=in reclamation

The information in this table is from the Utah Division of Oil, Gas and Mining. Large Mine permits are as those having more than five acres disturbance. Locations of Small Mine permits (less than five acres disturbance) are not included in the table or the map. Processing plants are indicated in the table only within the permit area. Some permits may show less than five acres disturbance due to reclamation or suspension. Active mines are shown in bold. Locations are relative to the Salt Lake Base Line and Meridian; those are relative to the Uintah Base Line and Meridian.
